

NEW MAHINDRA MAXXIMO PLUS.

Powered By Fuel Smart Technology

Mahindra
MAXXIMO PLUS
The Power of Technology

The new Mahindra Maxximo Plus is designed to meet the demands of your business. It's powered by Fuel Smart, a one-of-its-kind technology that lets you control both power and mileage. It's high on toughness. And low on maintenance. It comes with a host of features that ensure you stay ahead. Always.

Here's how the new Maxximo Plus offers you the 'plus' advantage to keep you ahead:

Presenting the Fuel Smart technology

Fuel Smart is an innovative yet simple-to-use technology that powers the new Mahindra Maxximo Plus. It allows you to switch between more power and more mileage as and when you need, at the push of a button. It has two modes of functioning:

Power Mode:

Switch to this mode when you want to utilise the entire 26 HP (19.2 kW) of power that the new Mahindra Maxximo Plus has to offer. For instance, when climbing up a steep incline on a full load.

Eco Mode:

Switch to this mode when you don't have the need for all that power. For instance, when going down an incline without any load. Using less power means the vehicle delivers an outstanding mileage of 21.9 KM/Litre**. So you save on fuel cost and earn more.

Performance Plus

Maximum power: 26 HP (19.2 kW) of power allows you to transport the heaviest of loads up the steepest of inclines with ease

Top speed: A top speed of 70 km/hr results in a faster turnaround time, more trips per day and hence, more earnings

Warranty: Complete peace of mind with a 2 years/60,000 km warranty*

**Depends of actual driving conditions. As per VRDE certification for Mahindra Maxximo Plus *whichever is earlier

← Long Wheelbase →

Toughness Plus

Long wheelbase: A long wheelbase of 1950 mm helps keep your new Mahindra Maxximo Plus stable on the most difficult terrains, even on a full load

Class-leading 7 leaf spring suspension: The 7 leaf springs make its rear suspension sturdier than other mini trucks that have only 3

Highest-in-class payload and the largest-in-class loading area: With a payload of 850 kg and a 35 sq. ft. (3.23 sq. mt.) loading tray, you carry more load per trip and earn more

Comfort Plus

Spacious cabin: With 85 cu. ft. (2.4 cu. mt.) cabin space, it's cabin is the widest and tallest in the class

Long co-driver's seat: Extra-cushioned seats with no obstruction between driver and co-driver seat, so you can rest and even sleep between trips

Mobile charging point: To help you stay connected on the go

Style Plus

Stylish front look: An attractive front grille and distinct design are sure to help you stand out on the road

2-tone interiors and a stylish dashboard: Interiors are aesthetically designed giving the vehicle a car-like feel

Safety Plus

LSPV brakes with booster assist: Equipped with an efficient braking system, the vehicle stays in your control and is much safer to drive

Frontal crash structure: An impact absorbing structure between the front bumper and chassis minimizes chances of injury in case of a collision
